FULL STACK SOFTWARE ENGINEER

Experience in Ruby and JavaScript-based programming languages with a background in client services. Confident Bootcamp grad who knows how to work well under pressure and learn quickly. Flexible and agile with a zest for problem-solving and working with people. Understands the client's perspective and excitedly translates that into a positive experience. Proven ability to lead, collaborate and innovate. Passion for Social Justice, equity, animal rescue, and music. Motivated to continue advancing new skillset in the wide world of tech and continue helping people.

TECHNICAL SKILLS

Ruby on Rails, React, Javascript, SQLite, CSS, HTML, Ruby Geocoder, Bootstrap, Postgres, Postman, Mapbox, EmailJS

TECHNICAL PROJECTS

Community Cat Catalog - [Github](#) | [Demo](#)

Catalog and track stray cats in your community!

- Utilized React-Map-GL and Ruby-Geocoder to plot dynamic markers on a map.
- Worked with Ruby-on-Rails and Postgres to create a comprehensive Cat database.
- Used Bcrypt to allow users to log in and track their own cats.

AnotherTreasure - [Github](#)

Connecting charitable organizations with the community for used clothing and household donations.

- Utilized React Map-GL to display markers on a map interface.
- Worked with EmailJS for direct emails from users to organizations
- Created a form for users to add items to the database and edit those items.

TarotReader - [Github](#) | [Demo](#)

Step right in for your virtual tarot reading and experience.

- Developed an extensive JSON API with tarot card details.
- Implemented RESTful routing in order to display unique pages for each tarot card.
- Created several interactive features through a combination of CSS and JS.
